WELCOME TO KIDSTIME

A PLACE WHERE LEARNING MEETS LOVE & LAUGHTER

At Kidstime, we nurture your child's curiosity, creativity, and confidence through our unique play-based and child-focused learning approach. From infancy to preschool and into the primary years, we provide a loving, structured, and secure environment to help every child grow, explore, and succeed.

OUR PROGRAMMES

Infant Care (3 months to 13 months)

- Cozy, clean, and safe baby rooms
- Gentle routines (feeding, nap, play, music)
- Individual care and close attention
- CCTV access available for new parents
- Real-time updates with photos and daily reports

Toddler Playschool (14 months to 3 years)

- Sensory and hands-on play
- Music, motor skills, and story time
- Social-emotional development

"NURTURE WITH LOVE,
GROW WITH CARE"

Preschool (4 years - 6 years)

- Holistic curriculum: English, Bahasa Melayu, Mandarin, Math, Science & Art
- Thematic and experiential learning
- Pre-writing, reading, and academic readiness
- Emphasis on confidence, care, and creativity
- Building a strong foundation for Primary School / International School

Primary Daycare (7 years to 12 years)

"CARE BEYOND THE CLASSROOM"

- Transportation from school to daycare
- Daily logs and photo updates for parents
- Homework guidance and spelling (ejaan) support
- Home-cooked, nutritious lunch and snacks
- Afternoon enrichment: art, games, and play
- Tuition for English, Mandarin, Math, Science, History & Bahasa Melayu
- Clean, cozy, and structured daycare routine

The Leading **Preschool** Management System in Singapore

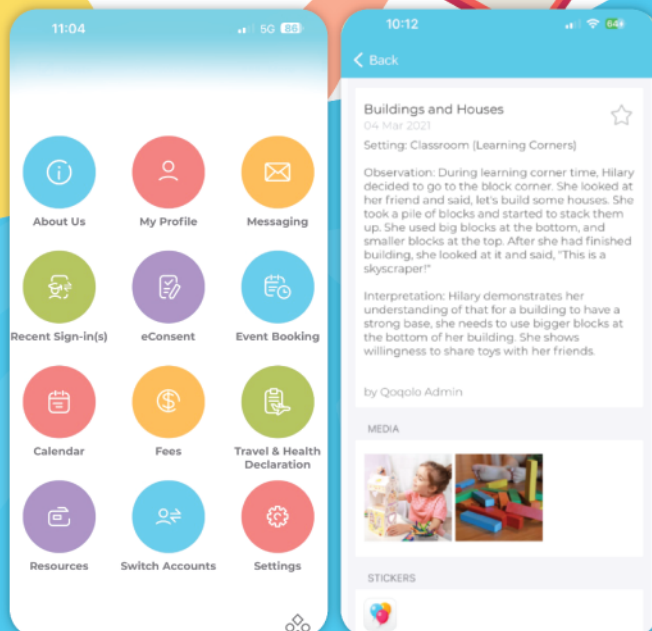

Are you a preschool looking to elevate your educational experience?
Or perhaps you're ready to streamline your school's operations and improve parent engagement?

Qoqolo Student Management System

We're transforming the way preschools manage student enrollment, progress, enhance communication, and foster growth for both educators and children.

For Preschool Owners and Administrators:

- ♥ The Smart Companion for your preschools
- ♥ Seamless Teacher - Parent Communication Made Easy
- ♥ Teachers app for instant access
- ♥ Students Portfolio
- ♥ E-Consent, E-Forms & E-Payment
- ♥ Your Own Preschool App

Why Preschool Owners Choose Us?

Qoqolo Student Management System offers a comprehensive, easy-to-use platform that helps preschools streamline operations, improve student tracking, and enhance communication with parents. It's the perfect solution to create a more efficient and impactful learning environment.

Your Next Steps

Preschool Owners: Take the **next** step towards streamlining your school's operations and enhancing the learning experience for every child!

New! Mental Calculation SoroTouch

What is "SoroTouch"?

Over 60% of the students can solve these problems in around 2 years.

$$\begin{array}{r} 45 \\ 97 \\ -16 \\ \hline 50 \\ 38 \\ -24 \\ \hline 82 \\ 78 \\ \hline ?? \end{array}$$

$$\begin{array}{r} 515 \\ 366 \\ -762 \\ \hline 932 \\ ?? \end{array}$$

$$649 \times 8 = ???$$

$$5201 \div 7 = ???$$

Within 10sec!

Within 7sec!

Math at school is easy now!

Fast way to acquire mental calculation skills!

SoroTouch is a new way to acquire mental calculation skills by using a tablet.

Students can acquire abacus style mental calculation skills that would become a lifelong asset.

After learning how to calculate faster and more accurately through the visible mode, students will begin to learn through the invisible mode in which they imagine the beads lighting up in their minds. If children from ages 5 to 8 years old practice daily using these two modes, they can acquire mental calculation skills.

Increase speed and imaging skills with the "two-hand method!"

Learn while having fun with games and songs!

Check the everyday learning by using "Record!"

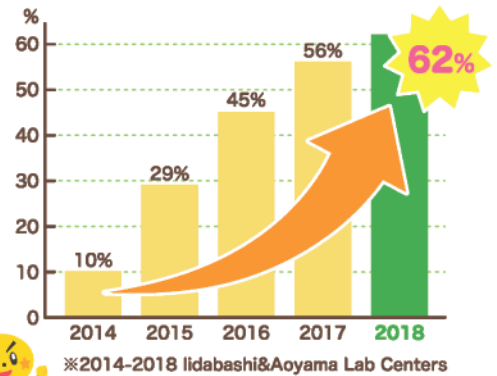

Made so that the students can build self-confidence.
Students who acquired high mental calculation skills went up from 10% to 62%.

This is how SoroTouch was made.

I started an abacus school thinking that mental calculation skills that do not rely on information technology would create significant value in the IT-oriented society. Abacus style mental calculation is the fastest way of calculation method in the world, and it can be a lifelong asset. However, there were problems such as only 10% of the students could acquire high mental calculation skills. Also, it took more than 4 years to become a mental calculation master. That is how I thought of developing the tablet-based learning app, SoroTouch. From 2014, hundreds of students, parents, and school staff participated in the daily trial and error to develop SoroTouch. Now, about 62% of students can acquire high mental calculation skills in an average of 2 years. Calculation skill is a foundation of learning and I hope that the children who learned by using SoroTouch can pursue their passions within any field.

Abacus style mental calculation
Changes in the percentage of
mental calculation masters

Input at home

Practice little bit everyday

Students can learn while having fun by using videos, songs, and games. The difficulty level is automatically adjusted according to the accuracy so students can proceed efficiently.

By using the record, students can keep track of the learning history and see where they made a mistake.

Fun features motivate the students to continue learning. Students can collect flags or fishes by proceeding with their learning.

Download the App!

Output once a week

Learn together with friends!

At SoroTouch centers, we use center only system and play games such as Relay and Flash to motivate the students to continue their learning.

Learning history will be carried over when studying at the centers. Also, different levels and age of students can compete and have fun through various activities.

Center students can compete with one another and have the chance to demonstrate what he/she can do in front of others. We are continuously trying to develop an environment where our students would want to challenge and have fun.

Have fun while
learning in a group!

Our expertises is to care for
gifted individuals
age 4 and above

Dyslexia

Aspeger

Downs
Syndrome

Pic 1 : 24 Young Artist participating in children are painting the world Kazakhstan 2019., It's a world class with a participators from 365 country with more than 100,000 submission. 7 winners from Gibran method

Why The Young Artist Program?

The Young Artist Program initiate to equip all children with a necessary skill for a better living, as they explore the world through creation and imagination. Empowering them thru Visual arts matters As a result they will be able to think critically and independently, build enough coping skills to be resilient in the face of challenges, and understand the role of effort in success.

How gifted individual will benefit from TYAP

Studies had found out that "gifted individuals' especially students with dyslexia had a statistically significantly higher propensity for unusual combination of ideas, which is an aspect of creative thinking, comparing with normally developing students." The Young Artist Program TYAP is the key to your child's transformations from Zero to Hero

Pic 2 : Our children will go through "zero to hero" transformations in The Young Artist program. (TYAP)

What make us special?

- Professional art Instructor
- Small groups ratio 1:4
- Special mentioning guide
- Individual assessment and Progress report
- structured design program
- Medium of Instructions - Malay & English

We committed to polish and shine their Artistic skills

These qualities or strengths gives you, what is called slight edge to create a positioning for you among the peers, competitors and expert.

- Forming a habit of proactive learning
- Discovering your Unique potential and master it.
